Canada

Dear Mary,

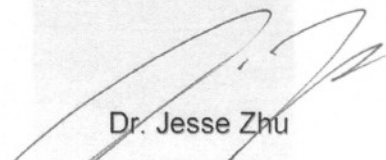

Thank you so much for your donation of so nice ginseng roots and the Mary ginseng powder to the University of Western Ontario for our research work.

Making some value – added North American Ginseng is the main purpose of our research. And such work needs not only the efforts of scientific community but also the cooperation of industrial and business professionals. During the past few years, you have always been an active participant and contributor to our ginseng research work. I think such cooperation is valuable and beneficial for both the scientific and business development of Ontario North American Ginseng industry.

As to the comparison of your Mary Ginseng with other common Ontario Ginseng, although the initial tests showed some superior properties of your ginseng, we would like to do some more work to confirm. We have now collected 5 batches of Ontario Ginseng harvested in 2007 from different ginseng farms. We need to collect and analyze more samples before getting a preliminary conclusion. The results of our comparison will be sent to you as soon as we finish such work.

Thanks again

Sincerely yours

Dr. Jesse Zhu
